

Josh Stack

Northeast Green Building Consulting, LLC

Josh is an attorney & counselor at law, resilience, and biomimicry. He focuses on translating the sciences of resilience, biomimicry and life sciences (both traditional & scientific ecological knowledge) to support the design and construction of buildings, cities and complex sustainability initiatives.

Past projects include: facilitating a community deconstruction infrastructure based on the ecosystem service of decomposition & law of reciprocity in living systems; developing place-based metrics for buildings and cities based on surrounding living system; supporting the design & construction of innovative and sustainable homes; coordinating a diversity of LEED for Homes projects; and forming a biomimicry regional network & resilience guild. He also lectures, internationally, on resilience science for buildings & cities and biomimicry. Recent presentations include Greenbuild 2013, Omega Institute Ecoliteracy Immersion program 2013, Building a Greener Adirondacks 2014, SXSW Eco 2012, Greening the Caribbean, the NYS Green Building Conference and Syracuse Center of Excellence Symposium.

Educated first in biology and living systems at Cornell University, then in law at the SUNY Buffalo School of Law, the Cornell University School of Law and NYU College of Law, he adapts this education with his practice of law and construction experience to support clients in making, remaking, salvaging and constructing buildings, communities, and initiatives into functionally and structural renewing and resilient infrastructures of living systems.
